Subject Index of Volume 203

- AlCuFeCeZr alloy**
mechanical properties, microstructure and crystal structures of $\text{Al}_{98-3x}\text{Cu}_{2x}\text{Fe}_x\text{Ce}_1\text{Zr}_1$ ($x = 1-3$ at.%) alloys extruded from their atomized powders 420
- Alloys**
low cycle fatigue behavior of an austenitic Fe–25Mn–5Al–1C alloy containing grain boundary precipitates L13
- Alumina fiber**
stiffness loss and density decrease due to thermal cycling in an alumina fiber/magnesium alloy composite 75
- α -alumina platelets**
experimental study of the effect of the anisotropy of orientation of the reinforcing particles on the tensile properties of aluminium matrix composites reinforced with α -alumina platelets 105
- Aluminium**
comparison between the experimental and theoretical tensile behaviour of aluminium-based metal matrix composites reinforced with preforms of α -alumina platelets 93
- Aluminium alloy polycrystals**
in-situ deformation of aluminium alloy polycrystals observed by high-voltage electron microscopy 238
- Aluminium matrix composites**
experimental study of the effect of the anisotropy of orientation of the reinforcing particles on the tensile properties of aluminium matrix composites reinforced with α -alumina platelets 105
- Aluminum**
localized deformation and elevated-temperature fracture of sub-micron-grain aluminum with dispersoids 256
- Aluminum alloys**
cyclic deformation of dispersion-strengthened aluminum alloys 46
- Al_2O_3**
a study of fiber coating in Al_2O_3 fiber-reinforced NiAlFe matrix composites 81
- Al–Pb dispersions**
coarsening of liquid Al–Pb dispersions under reduced gravity conditions 399
- Al–Si7Mg alloys**
microstructural evolution during partial remelting of Al–Si7Mg alloys 1
- Anisotropy**
experimental study of the effect of the anisotropy of orientation of the reinforcing particles on the tensile properties of aluminium matrix composites reinforced with α -alumina platelets 105
- Atom probe field ion microscopy**
chemical composition measurements of a nickel-base superalloy by atom probe field ion microscopy 69
- Atomic interaction**
study of the nitrogen or carbon and metal–component influence on interatomic interactions in austenitic steels by inelastic neutron scattering 300
- AuCu–Ag alloys**
structural aspects of AuCu I or AuCu II and a cuboidal block configuration of f.c.c. disordered phase in AuCu–Pt and AuCu–Ag pseudobinary alloys 154
- AuCu–Pt alloys**
structural aspects of AuCu I or AuCu II and a cuboidal block configuration of f.c.c. disordered phase in AuCu–Pt and AuCu–Ag pseudobinary alloys 154
- Austenite**
low cycle fatigue behavior of an austenitic Fe–25Mn–5Al–1C alloy containing grain boundary precipitates L13
- Austenitic steels**
study of the nitrogen or carbon and metal–component influence on interatomic interactions in austenitic steels by inelastic neutron scattering 300
- γ -base**
effects of niobium addition on the sustained-load cracking characteristics in lamellar microstructure γ -base TiAl 348
- Carbides**
low cycle fatigue behavior of an austenitic Fe–25Mn–5Al–1C alloy containing grain boundary precipitates L13
- Carbon**
study of the nitrogen or carbon and metal–component influence on interatomic interactions in austenitic steels by inelastic neutron scattering 300
- Carbon aluminides**
diffusion paths and reaction mechanisms in the high-temperature chemical interaction between carbon and titanium aluminides 222
erratum to “Superplastic behaviour of a rapidly solidified 7475 aluminium alloy” [Mater. Sci. Eng. A194 (1995) 129] 427
- Ceramic**
stiffness loss and density decrease due to thermal cycling in an alumina fiber/magnesium alloy composite 75
- Ceramics**
notched tensile creep testing of ceramics 217
- Coarsening**
coarsening of liquid Al–Pb dispersions under reduced gravity conditions 399
- Computer simulation**
strain hardening of steels at large strain deformation. Part III: Model description and physical interpretation 36
- Copper**
softening of the elastic modulus in submicrocrystalline copper 165
- Corrosion behaviour**
effect of sulfur on the cyclic oxidation behavior of a single crystalline, nickel-base superalloy 388
the effect of heat treatment on corrosion behavior of laser surface melted 304L stainless steel 324
- Corrosion fatigue**
the relationship between crystallographic texture and salt water cracking susceptibility in Ti–6Al–4V 365

- Coffin–Manson relationship
 - low cycle fatigue behavior of an austenitic Fe–25Mn–5Al–1C alloy containing grain boundary precipitates L13
- Crack tip
 - finite element simulation to investigate interaction between crack and particulate reinforcements in metal-matrix composites 286
- Creep analysis
 - a creep analysis of the deflection test for evaluating oxide growth stresses 117
- Crystal dislocations
 - on the stress fields of crystal dislocations with fractal geometry 203
- Crystal structure
 - mechanical properties, microstructure and crystal structures of $\text{Al}_{98-3x}\text{Cu}_{2x}\text{Fe}_x\text{Ce}_1\text{Zr}_1$ ($x = 1-3$ at.%) alloys extruded from their atomized powders 420
- Crystallographic texture
 - the relationship between crystallographic texture and salt water cracking susceptibility in Ti–6Al–4V 365
- Crystallography
 - structural aspects of AuCu I or AuCu II and a cuboidal block configuration of f.c.c. disordered phase in AuCu–Pt and AuCu–Ag pseudobinary alloys 154
- Cyclic deformation
 - cyclic deformation of dispersion-strengthened aluminum alloys 46
- Deformation
 - Preparation and properties of ultrafine (submicron) structure titanium alloys L1
 - dislocation-creep-controlled superplasticity at high strain rates in the ultrafine-grained quasi-eutectoid Ti–10Co–4Al alloy 128
 - in-situ deformation of aluminium alloy polycrystals observed by high-voltage electron microscopy 238
 - localized deformation and elevated-temperature fracture of submicron-grain aluminum with dispersoids 256
 - softening of the elastic modulus in submicrocrystalline copper 165
- Dendritic growth
 - a simple technique for the measurement of dendritic growth rates in undercooled metallic melts and its application to Ni and Ti 197
- Density
 - stiffness loss and density decrease due to thermal cycling in an alumina fiber/magnesium alloy composite 75
- Deflection test
 - a creep analysis of the deflection test for evaluating oxide growth stresses 117
- Dislocation
 - in-situ deformation of aluminium alloy polycrystals observed by high-voltage electron microscopy 238
- Dispersion strengthening
 - cyclic deformation of dispersion-strengthened aluminum alloys 46
- Dispersoids
 - localized deformation and elevated-temperature fracture of submicron-grain aluminum with dispersoids 256
- Diffusion
 - liquid grooving at grain boundaries 373
- Diffusion paths
 - diffusion paths and reaction mechanisms in the high-temperature chemical interaction between carbon and titanium aluminides 222
 - erratum to “Superplastic behaviour of a rapidly solidified 7475 aluminium alloy” [Mater. Sci. Eng. A194 (1995) 129] 427
- Duplex stainless steels
 - effect of solution treatment on the transformation behaviour of cold-rolled duplex stainless steels 356
- Elastic pullout
 - the problem of fiber pullout 332
- Elastic stress fields
 - on the stress fields of crystal dislocations with fractal geometry 203
- Electron microscopy
 - in-situ deformation of aluminium alloy polycrystals observed by high-voltage electron microscopy 238
- Elevated-temperature
 - localized deformation and elevated-temperature fracture of submicron-grain aluminum with dispersoids 256
- Environmental effects
 - effects of niobium addition on the sustained-load cracking characteristics in lamellar microstructure γ -base TiAl 348
- Fe_3Al
 - development of the microstructure and crystallographic texture during annealing of a rolled polycrystalline Fe_3Al alloy 208
- Fiber coating
 - a study of fiber coating in Al_2O_3 fiber-reinforced NiAlFe matrix composites 81
- Fibres
 - the problem of fiber pullout 332
- Field ion microscopy
 - field ion microscopy observation of mechanical twinning in pure iridium 415
- Finite element method
 - three-dimensional finite element analysis of composites with coated spherical inclusions 314
- Finite element simulation
 - finite element simulation to investigate interaction between crack and particulate reinforcements in metal-matrix composites 286
- Fractal geometry
 - on the stress fields of crystal dislocations with fractal geometry 203
- Fracture
 - hydrogen-assisted cracking in a precipitation-hardened stainless steel: effects of heat treatment and displacement rate 377
 - localized deformation and elevated-temperature fracture of submicron-grain aluminum with dispersoids 256
- Fracture toughness
 - mechanical behaviour of mullite composites reinforced with mullite fibres 171
- Functionally gradient materials
 - properties of TiC– Ni_3Al composites and structural optimization of TiC– Ni_3Al functionally gradient materials 272
- Garnet
 - Letter Shape modification of ZrO_2 particles in yttrium–iron garnet L5
- Grain boundaries
 - liquid grooving at grain boundaries 373
- Grain growth
 - aspects of twinning and grain growth in high purity and commercially pure nickel 408
 - thermal stability of nanocrystalline Ni 177
- Heat treatment
 - effect of sulfur on the cyclic oxidation behavior of a single crystalline, nickel-base superalloy 388
 - hydrogen-assisted cracking in a precipitation-hardened stainless steel: effects of heat treatment and displacement rate 377
 - the effect of heat treatment on corrosion behavior of laser surface melted 304L stainless steel 324
- High strain rates
 - the mechanical properties of tungsten-based composites at very high strain rates 140
- High temperatures
 - microstructural investigation of the effects of oxygen exposure on NARloy-Z 246

- High-temperature chemical interaction
 - diffusion paths and reaction mechanisms in the high-temperature chemical interaction between carbon and titanium aluminides 222
 - erratum to "Superplastic behaviour of a rapidly solidified 7475 aluminium alloy" [Mater. Sci. Eng. A194 (1995) 129] 427
- Hydrogen assisted cracking
 - hydrogen-assisted cracking in a precipitation-hardened stainless steel: effects of heat treatment and displacement rate 377
- Interphase
 - three-dimensional finite element analysis of composites with coated spherical inclusions 314
- In-20 at.% Ti
 - self-excited oscillation and non-linear anelasticity of In-20 at.% Ti due to transformation twins 343
- Iridium
 - field ion microscopy observation of mechanical twinning in pure iridium 415
- Kinetic dissolution
 - liquid grooving at grain boundaries 373
- Lamellar microstructure
 - effects of niobium addition on the sustained-load cracking characteristics in lamellar microstructure γ -base TiAl 348
- Liquid grooving
 - liquid grooving at grain boundaries 373
- Longitudinal extension
 - the problem of fiber pullout 332
- Low cycle fatigue
 - cyclic deformation of dispersion-strengthened aluminum alloys 46
- Mechanical alloying
 - cyclic deformation of dispersion-strengthened aluminum alloys 46
- Mechanical behavior
 - mechanical behaviour of mullite composites reinforced with mullite fibres 171
- Mechanical cycling
 - effect of mechanical cycling on the pseudoelasticity characteristics of Ti-Ni and Ti-Ni-Cu alloys 187
- Mechanical properties
 - strain hardening of steels at large strain deformation. Part II: Strain hardening of pearlitic and austenitic steels and the estimation of mechanical properties 26
 - the mechanical properties of tungsten-based composites at very high strain rates 140
- Mechanical property
 - mechanical properties, microstructure and crystal structures of $\text{Al}_{98-3x}\text{Cu}_{2x}\text{Fe}_x\text{Ce}_1\text{Zr}_1$ ($x = 1-3$ at.%) alloys extruded
- Mechanical twinning
 - field ion microscopy observation of mechanical twinning in pure iridium 415
- Metal matrix composites
 - comparison between the experimental and theoretical tensile behaviour of aluminium-based metal matrix composites reinforced with preforms of α -alumina platelets 93
- Metallic melts
 - a simple technique for the measurement of dendritic growth rates in undercooled metallic melts and its application to Ni and Ti 197
- Metal-matrix composite
 - in-situ formation of the $\text{Ti}_3\text{Al-SiC}$ metal matrix composite system from its components 305
- Metal-matrix composites
 - finite element simulation to investigate interaction between crack and particulate reinforcements in metal-matrix composites 286
- Microsegregation
 - influence of solidification on the microstructural evolution of nickel base weld metal 134
- Microstructure
 - comparison between the experimental and theoretical tensile behaviour of aluminium-based metal matrix composites reinforced with preforms of α -alumina platelets 93
 - development of the microstructure and crystallographic texture during annealing of a rolled polycrystalline Fe_3Al alloy 208
 - mechanical properties, microstructure and crystal structures of $\text{Al}_{98-3x}\text{Cu}_{2x}\text{Fe}_x\text{Ce}_1\text{Zr}_1$ ($x = 1-3$ at.%) alloys extruded
 - microstructural evolution during partial remelting of Al-Si7Mg alloys 1
 - strain hardening of steels at large strain deformation. Part I: Relationship between strain hardening and microstructures of b.c.c. steels 14
 - structural aspects of AuCu I or AuCu II and a cuboidal block configuration of f.c.c. disordered phase in AuCu-Pt and AuCu-Ag pseudobinary alloys 154
 - thermal stability of nanocrystalline Ni 177
 - void initiation and microstructural changes during wire drawing of pearlitic steels 278
- Mullite composites
 - mechanical behaviour of mullite composites reinforced with mullite fibres 171
- Mullite fibers
 - mechanical behaviour of mullite composites reinforced with mullite fibres 171
- M_d calculations
 - influence of solidification on the microstructural evolution of nickel base weld metal 134
- NiAlFe matrix composites
 - a study of fiber coating in Al_2O_3 fiber-reinforced NiAlFe matrix composites 81
- Nickel
 - a simple technique for the measurement of dendritic growth rates in undercooled metallic melts and its application to Ni and Ti 197
 - thermal stability of nanocrystalline Ni 177
- Nickel base alloys
 - influence of solidification on the microstructural evolution of nickel base weld metal 134
- Nickel-base superalloy
 - chemical composition measurements of a nickel-base superalloy by atom probe field ion microscopy 69
- Niobium addition
 - effects of niobium addition on the sustained-load cracking characteristics in lamellar microstructure γ -base TiAl 348
- Nitrogen
 - study of the nitrogen or carbon and metal-component influence on interatomic interactions in austenitic steels by inelastic neutron scattering 300
- Non-linear anelasticity
 - self-excited oscillation and non-linear anelasticity of In-20 at.% Ti due to transformation twins 343
- Notches
 - notched tensile creep testing of ceramics 217
- Oscillation
 - self-excited oscillation and non-linear anelasticity of In-20 at.% Ti due to transformation twins 343

- Oxide growth
 - a creep analysis of the deflection test for evaluating oxide growth stresses 117
- Oxygen exposure
 - microstructural investigation of the effects of oxygen exposure on NARloy-Z 246
- Pearlitic steels
 - void initiation and microstructural changes during wire drawing of pearlitic steels 278
- Plastic deformation
 - strain hardening of steels at large strain deformation. Part III: Model description and physical interpretation 36
- Platelets
 - comparison between the experimental and theoretical tensile behaviour of aluminium-based metal matrix composites reinforced with preforms of α -alumina platelets 93
- Polycrystals
 - softening of the elastic modulus in submicrocrystalline copper 165
- Pseudoelasticity
 - effect of mechanical cycling on the pseudoelasticity characteristics of Ti-Ni and Ti-Ni-Cu alloys 187
- Pure nickel
 - aspects of twinning and grain growth in high purity and commercially pure nickel 408
- Reaction mechanisms
 - diffusion paths and reaction mechanisms in the high-temperature chemical interaction between carbon and titanium aluminides 222
 - erratum to "Superplastic behaviour of a rapidly solidified 7475 aluminium alloy" [Mater. Sci. Eng. A194 (1995) 129] 427
- Recovery
 - development of the microstructure and crystallographic texture during annealing of a rolled polycrystalline Fe₃Al alloy 208
- Recrystallization
 - development of the microstructure and crystallographic texture during annealing of a rolled polycrystalline Fe₃Al alloy 208
- Reduced gravity
 - coarsening of liquid Al-Pb dispersions under reduced gravity conditions 399
- Reinforcing particles
 - experimental study of the effect of the anisotropy of orientation of the reinforcing particles on the tensile properties of aluminium matrix composites reinforced with α -alumina platelets 105
- Remelting
 - microstructural evolution during partial remelting of Al-Si7Mg alloys 1
- Residual stresses
 - an experimental study of residual stresses in SiC-fiber-reinforced Ti-based composites 59
- Rhenium
 - chemical composition measurements of a nickel-base superalloy by atom probe field ion microscopy 69
- Salt water
 - the relationship between crystallographic texture and salt water cracking susceptibility in Ti-6Al-4V 365
- Scanning electron microscopy
 - void initiation and microstructural changes during wire drawing of pearlitic steels 278
- SiC
 - in-situ formation of the Ti₃Al-SiC metal matrix composite system from its components 305
- SiC fibers
 - an experimental study of residual stresses in SiC-fiber-reinforced Ti-based composites 59
- Solution treatment
 - effect of solution treatment on the transformation behaviour of cold-rolled duplex stainless steels 356
- Stainless steel
 - effect of sulfur on the cyclic oxidation behavior of a single crystalline, nickel-base superalloy 388
 - hydrogen-assisted cracking in a precipitation-hardened stainless steel: effects of heat treatment and displacement rate 377
 - the effect of heat treatment on corrosion behavior of laser surface melted 304L stainless steel 324
- Steels
 - strain hardening of steels at large strain deformation. Part I: Relationship between strain hardening and microstructures of b.c.c. steels 14
 - strain hardening of steels at large strain deformation. Part II: Strain hardening of pearlitic and austenitic steels and the estimation of mechanical properties 26
 - strain hardening of steels at large strain deformation. Part III: Model description and physical interpretation 36
- Stiffness
 - stiffness loss and density decrease due to thermal cycling in an alumina fiber/magnesium alloy composite 75
- Strain
 - dislocation-creep-controlled superplasticity at high strain rates in the ultrafine-grained quasi-eutectoid Ti-10Co-4Al alloy 128
- Strain deformation
 - strain hardening of steels at large strain deformation. Part I: Relationship between strain hardening and microstructures of b.c.c. steels 14
 - strain hardening of steels at large strain deformation. Part II: Strain hardening of pearlitic and austenitic steels and the estimation of mechanical properties 26
- Strain hardening
 - strain hardening of steels at large strain deformation. Part I: Relationship between strain hardening and microstructures of b.c.c. steels 14
 - strain hardening of steels at large strain deformation. Part II: Strain hardening of pearlitic and austenitic steels and the estimation of mechanical properties 26
 - strain hardening of steels at large strain deformation. Part III: Model description and physical interpretation 36
- Stress analysis
 - a creep analysis of the deflection test for evaluating oxide growth stresses 117
- Stress corrosion cracking
 - the relationship between crystallographic texture and salt water cracking susceptibility in Ti-6Al-4V 365
- Stress distribution
 - finite element simulation to investigate interaction between crack and particulate reinforcements in metal-matrix composites 286
- Stress field
 - three-dimensional finite element analysis of composites with coated spherical inclusions 314
- Structural optimization
 - properties of TiC-Ni₃Al composites and structural optimization of TiC-Ni₃Al functionally gradient materials 272
- Superplasticity
 - dislocation-creep-controlled superplasticity at high strain rates in the ultrafine-grained quasi-eutectoid Ti-10Co-4Al alloy 128
- Sustained-Road cracking
 - effects of niobium addition on the sustained-load cracking characteristics in lamellar microstructure γ -base TiAl 348

- Tensile creep
 - notched tensile creep testing of ceramics 217
- Tensile properties
 - experimental study of the effect of the anisotropy of orientation of the reinforcing particles on the tensile properties of aluminium matrix composites reinforced with α -alumina platelets 105
- Texture
 - development of the microstructure and crystallographic texture during annealing of a rolled polycrystalline Fe₃Al alloy 208
- Thermal expansion mismatch
 - stiffness loss and density decrease due to thermal cycling in an alumina fiber/magnesium alloy composite 75
- Thermal stability
 - thermal stability of nanocrystalline Ni 177
- Three-phase composites
 - three-dimensional finite element analysis of composites with coated spherical inclusions 314
- Ti-based composites
 - an experimental study of residual stresses in SiC-fiber-reinforced Ti-based composites 59
- TiC-Ni₃Al composites
 - properties of TiC-Ni₃Al composites and structural optimization of TiC-Ni₃Al functionally gradient materials 272
- Titanium
 - a simple technique for the measurement of dendritic growth rates in undercooled metallic melts and its application to Ni and Ti 197
- Titanium alloys
 - Preparation and properties of ultrafine (submicron) structure titanium alloys L1
- Titanium aluminides
 - diffusion paths and reaction mechanisms in the high-temperature chemical interaction between carbon and titanium aluminides 222
 - erratum to "Superplastic behaviour of a rapidly solidified 7475 aluminium alloy" [Mater. Sci. Eng. A194 (1995) 129] 427
 - effects of niobium addition on the sustained-load cracking characteristics in lamellar microstructure γ -base TiAl 348
- Ti₃Al
 - in-situ formation of the Ti₃Al-SiC metal matrix composite system from its components 305
- Ti-10Co-4Al alloy
 - dislocation-creep-controlled superplasticity at high strain rates in the ultrafine-grained quasi-eutectoid Ti-10Co-4Al alloy 128
- Ti-Ni alloys
 - effect of mechanical cycling on the pseudoelasticity characteristics of Ti-Ni and Ti-Ni-Cu alloys 187
- Ti-Ni-Cu alloys
 - effect of mechanical cycling on the pseudoelasticity characteristics of Ti-Ni and Ti-Ni-Cu alloys 187
- Transformation behaviour
 - effect of solution treatment on the transformation behaviour of cold-rolled duplex stainless steels 356
- Transformation twins
 - self-excited oscillation and non-linear anelasticity of In-20 at.% Ti due to transformation twins 343
- Tungsten-based composites
 - the mechanical properties of tungsten-based composites at very high strain rates 140
- Twinning
 - aspects of twinning and grain growth in high purity and commercially pure nickel 408
- Ultrafine structure
 - Preparation and properties of ultrafine (submicron) structure titanium alloys L1
- Undercooling
 - a simple technique for the measurement of dendritic growth rates in undercooled metallic melts and its application to Ni and Ti 197
- Void initiation
 - void initiation and microstructural changes during wire drawing of pearlitic steels 278
- Young's modulus softening
 - softening of the elastic modulus in submicrocrystalline copper 165
